ICHOM Standard Set for
LOW BACK PAIN

Details
1: Includes operative mortality, nerve root injury including cauda equina, deep wound infection, pulmonary embolus, wrong site procedure, vascular injury, dural tear, other, and need for rehospitalisation.
2: Tracked via the Oswestry Disability Index (ODI)
3: Tracked via the Numeric Pain Rating Scale (NPRS)
4: Tracked via the EuroQol-5D (EQ-5D)
The ICHOM Standard Set is the result of hard work by a group of leading physicians, measurement experts and patients together with the non-profit organization ICHOM. It represents the outcomes that matter most to patients with low back pain. We urge all providers around the world to start measuring these outcomes to better understand how to improve the lives of the patients they serve.

**The Working Group**

- **Australia**
  - Beth Morrison | Newro Foundation
  - Michelle Davies | St. Paul’s School
  - Richard Kahler | BrizBrain and Spine

- **Denmark**
  - Martin Gehrchen | University Hospital of Copenhagen, Rigshospitalet

- **Netherlands**
  - Miranda van Hoof | Sint Maartenskliniek

- **Norway**
  - Tore Solberg | University Hospital of North Norway

- **Singapore**
  - William Yeo | Singapore General Hospital
  - John Chen | Singapore General Hospital

- **Sweden**
  - Peter Fritzell | Ryhov Hospital, SweSpine
  - Olle Hägg | Spine Center Göteborg, SweSpine
  - Björn Strömquist | Lund University, SweSpine

- **United Kingdom**
  - Jeremy Fairbank | University of Oxford

- **United States**
  - Isador Lieberman | Texas Back Institute
  - Matthew Smuck | Stanford University Medical Center
  - Thomas Cha | Massachusetts General Hospital
  - Apy阮 | University of Pittsburgh Medical Center
  - Donna O’Hern | Texas Back Institute
  - Kevin Foley | University of Tennessee Health Science Center
  - Neal Umemoto | Rainier Orthopedic Institute, Spine SCOAP Collaborative
  - Safdar Khan | Ohio State University
  - Carter Clement | University of North Carolina at Chapel Hill
