

ICHOM Standard Set for

OLDER PERSON

Treatment approaches covered

Treatment approaches have not been defined due to the wide range of management options and interventions for the older population.

For a complete overview of the ICHOM Standard Set, including definitions for each measure, time points for collection, and associated risk factors, visit ichom.org/medical-conditions/Older-Person

Details

- ¹ Tracked via the UCLA 3-item Loneliness Scale
- ² Tracked via the 36-Item Short Form Survey Instrument Version 1 (SF-36)
- ³ Tracked via the SF-36
- ⁴ Tracked via the SF-36
- ⁵ Tracked via the Adult Social Care Outcomes Toolkit
- ⁶ Tracked by the Zarit Burden Interview 4-item screening questionnaire
- ⁷ Tracked via the Canadian Study on Health & Aging Clinical Frailty Scale

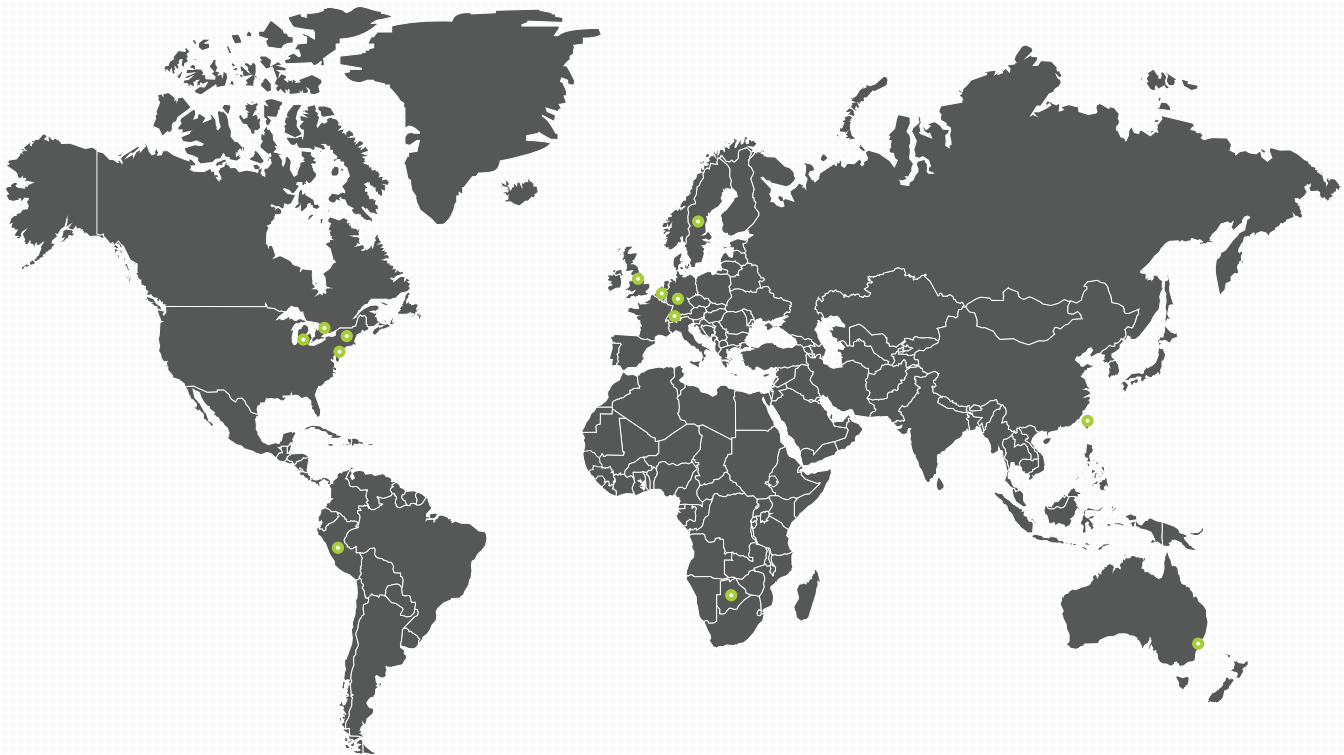

CONTRIBUTORS

For more information about the process of developing a Standard Set, visit ichom.org/how-we-work/
